Portfolio

PROFESSIONAL SUMMARY

Final-year ERP/BI engineering student at ESPRIT seeking PFE 2027. Built PostgreSQL reporting, Power BI analytics and tested API/ML integration for HR decisions. Currently studying SAP BW and ABAP/Fiori.

EXPERIENCE

ODDO BHF | Software Development Factory Intern

Jun 2026 - Aug 2026

- Consolidated Excel/CSV HR data across 12 domains in PostgreSQL; created 7 SQL reporting views with data quality checks.
- Designed a 4-page Power BI report with 25 DAX measures to track attendance, training hours and satisfaction.
- Implemented 10 authenticated .NET/EF Core analytics endpoints and Angular views; integrated Python ML and tested application components.

Main implementation: PostgreSQL / SQL, Power BI / DAX, .NET / EF Core, Angular, Python

Environment exposure: Apache Kafka, OpenShift

Ooredoo Tunisie | Software Engineering Intern

Jun 2025 - Jul 2025

- Developed Spring Boot/Angular B2B components and Power BI dashboards for contract and service KPI visibility.
- Integrated REST sources and ETL pipelines to consolidate telecom data; translated business needs into technical specifications.

AWARDS / COMPETITIONS

GreenOPS AI — 2nd Place | 2,000 TND Award

Data Engineer | AI Competition | Pharmaceutical Sustainability

- Collected and integrated multi-source data into a preparation pipeline for AI training.
- Prepared training-ready datasets aligned with pharmaceutical business needs; contributed data/prediction integration.

Tools withheld under NDA. LLM development delivered by teammates.

SELECTED PROJECTS

Intelligent Urban Mobility | Data / ML team contributor

Feb 2026 - May 2026

- Contributed Python data/feature pipelines and ML evaluation for BI-ready mobility, safety and environmental insights.
- Contributed FastAPI/n8n integration for predictions, retraining and persisted outputs in the team ML service.

Tech: Python, scikit-learn, FastAPI, n8n · GitHub / project evidence

Business Performance Prediction / ML Superstore

Nov 2025 - Dec 2025

- Applied CRISP-DM and evaluated supervised/unsupervised models for sales and profitability insights.
- Deployed a Streamlit app with model comparison, predictions and interactive summaries for business analysis.

Analysis repository / Application repository

TECHNICAL SKILLS

Data & BI: SQL / PostgreSQL / ETL / ELT / Power BI / DAX / Data modeling

ML & Programming: Python / Pandas / scikit-learn / FastAPI / n8n

Application Engineering: .NET / EF Core / Angular / Spring Boot / REST APIs / Git

Cloud & DevOps (coursework): AWS Fundamentals / DevOps / MLOps

ERP & SAP (coursework): SAP BW / ABAP / Fiori

EDUCATION

ESPRIT | Computer Engineering - ERP / Business Intelligence

Sep 2022 - Present | Final-year student; degree in progress.

CERTIFICATIONS

Fundamentals of Deep Learning | Introduction to Transformer-Based Natural Language Processing
